Custom Caller ID Setup Guide

iTel Mobile Dialer

A simple, step-by-step guide for account setup and calling.

01	Install App	Open iTel Mobile Dialer
02	Initialize	Wait for Operator Code
03	Operator Code	Enter code → OK
04	Account Details	Settings → credentials
05	Caller ID	Enter 92 format → SAVE
06	Call	Registered → dial with 00092

OP CODE: 87282 **USER ID:** 50505515

Caller ID: 923000000000 **Calling Prefix:** 00092

Important: Use the actual credentials supplied by the Sales Team. The values above are examples only. Never share real account credentials publicly.

STEP 1

Install & Open the iTel Mobile Dialer

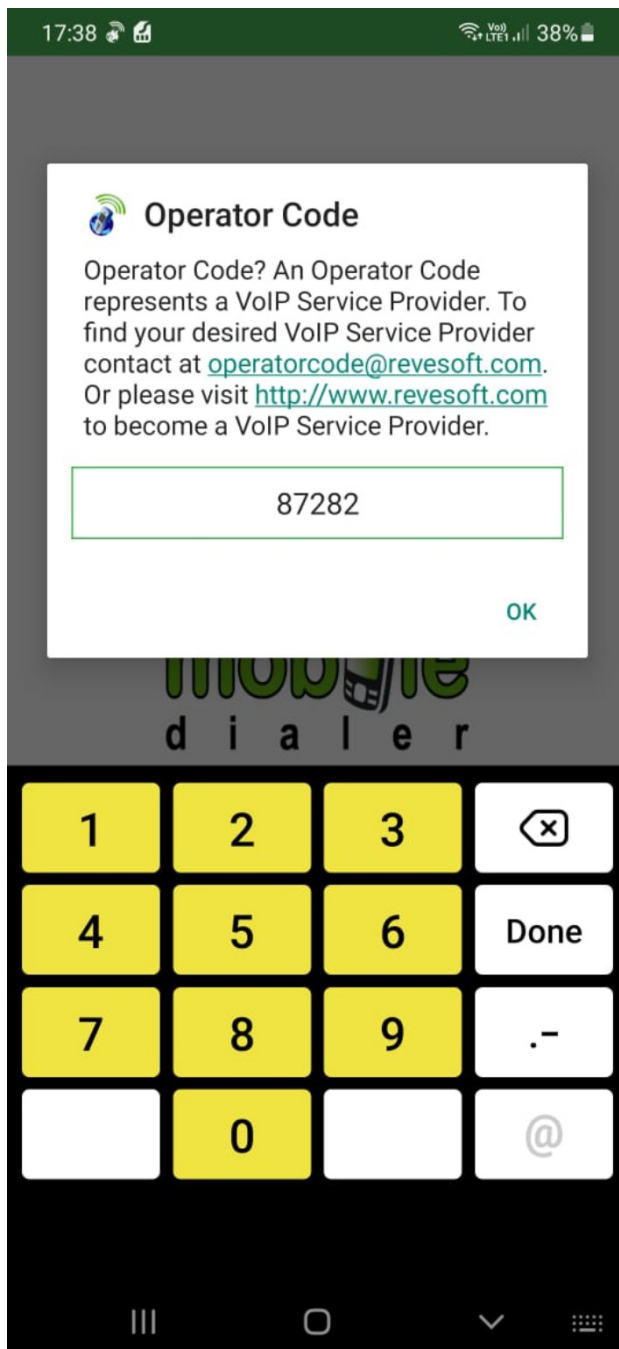

Install the iTel Mobile Dialer and open it.
Wait for the app to finish **Initializing Dialer**.

The **Operator Code** screen appears after initialization is complete.

Initializing Dialer

STEP 2

Enter Operator Code

Enter the **Operator Code** supplied by the Sales Team.

Dummy example: **87282**

After entering the code, tap **OK** to continue.

✓ Tap OK after entering the Operator Code.

STEP 4

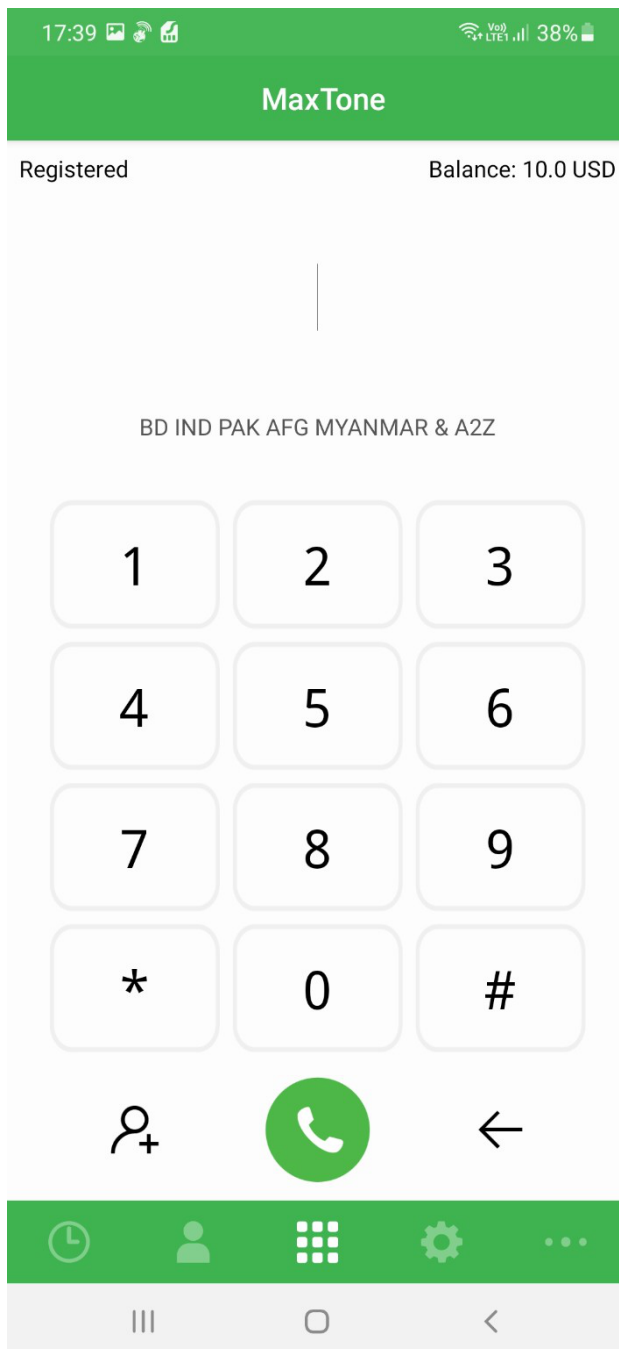

Set Your Custom Caller ID

In the **Caller ID** field, enter the desired number using international **92 format**.

Example: **923000000000**

Then tap **SAVE**.

✓ **Caller ID must be entered in 92 international format.**

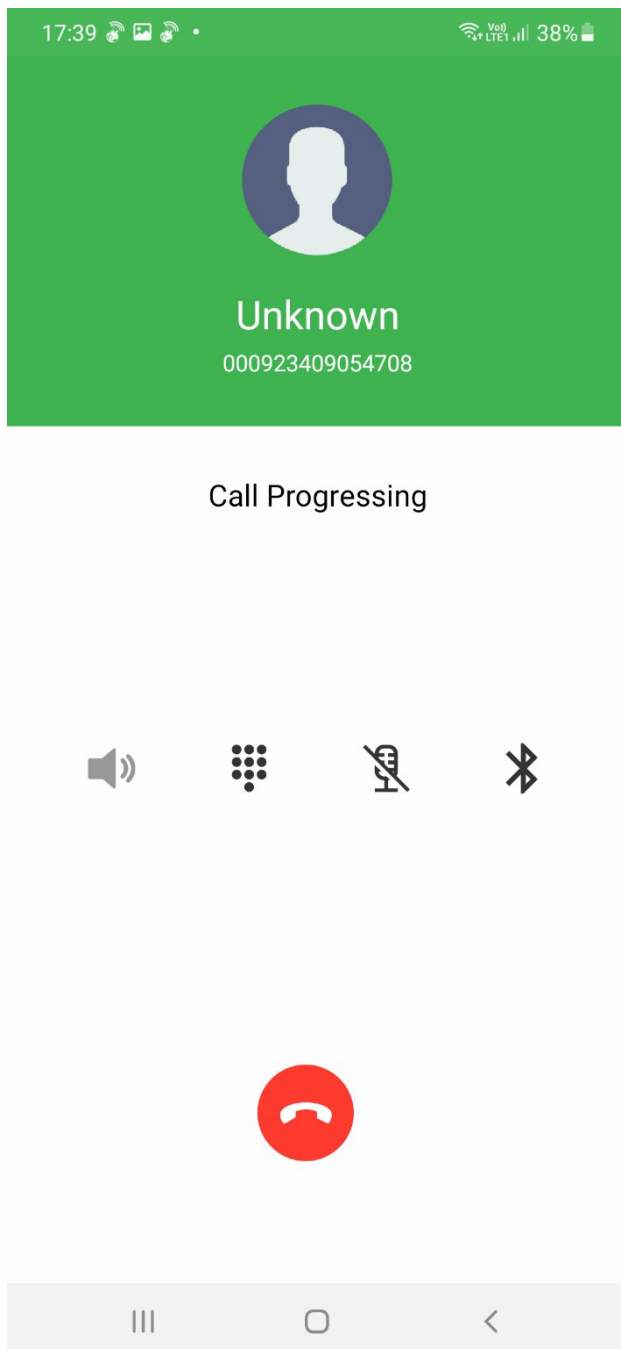

STEP 5

Confirm Registration

Return to the main dialer and check the account status.

When the status shows **Registered**, the account is ready for calling.

✓ Proceed only when the account shows **Registered**.

STEP 6

Dial the Destination Number

For outgoing calls, enter the required **00092** prefix before the destination number.

Example: **000923409054708**
Then press the call button.

✓ Keep the 00092 prefix before the destination number.

Quick Reference

Use these values as a format guide. Your real account details come from the Sales Team.
